"Current Projects", Trenton Council of Civic Associations, 1996

"The Vision Realized, an Exhibit of Current Planning and Development Projects in Trenton," Trenton Council of Civic Associations, 1994

EXPERIENCE

A talented project designer, Frank X. Moya has contributed his expertise to the design of a broad range of civic, institutional, commercial and mixed use facilities. His understanding of the relationship of various project components has been a valuable asset in developing master plans.

Mr. Moya's commitment to urban design projects represented his belief in the economic impact of redevelopment projects in urban areas. This idea shaped his concept approach to urban redevelopment and became the initiative for most of his projects. The strategic concept of "Urban Recycling" (Reciclaje Urbano) developed by Mr. Moya provided for an integrated team approach to the development of a balanced, long-term economic model for urban redevelopment projects. This particular model incorporates urban design, architecture, construction, financial planning and community development. Projects developed using this approach, like the Trenton Home Ownership Zone redevelopment, have been recognized by federal, state, civic and business organizations with numerous awards for excellence in design.

Before starting MOYA Architects in 1994, Mr. Moya worked for The Hillier Group as Project Architect and Designer (1984-1993). As an associate, he was the architect in charge of design for the firm's Healthcare/R&D Studio. Prior to joining Hillier, Mr. Moya also worked for Henry Horowitz and Associates in Princeton (1982-1984) in a variety of corporate, commercial and health care projects. He later continued his association with Henry Horowitz in joint venture projects under MOYA Architects.

In 2003 MOYA Architects merged with HACBM Architects, Engineers and Planners of Princeton, NJ (2003-2004). Mr. Moya became the firm's lead architect and Director of Design. There he actively steered the firm's design direction in urban design and educational projects. In 2005 Mr. Moya became Director of Architecture and Planning for LEEWOOD REAL ESTATE GROUP / NJ, LLC, an old client of MOYA Architects and an award winning real estate development firm with a specialization in urban housing and redevelopment in New York and New Jersey.

In 2008 Frank X. Moya joined Peter A. Matthews to open MATTHEWS MOYA ARCHITECTS a New York City based practice.

Mr. Moya's interest in urban issues and community service has taken him to serve appointments to the board of the New Jersey Historic Trust, the state's autonomous historical restoration fund overseen by the NJ Department of State; the advisory board for the Trenton Office for Policy Studies, a policy think-tank for the City of Trenton under the auspices of Edison State College responsible for achieving the nation's first *Weed and Seed* program designation; Co-chair of the Trenton Enterprise Initiative Coordinating Committee which helped focus federal and state urban aid to the city; and as Vice President for Trenton City Home, a housing development corporation.

Recently, Mr. Moya was the architectural consultant for Washington Township's (Mercer County, NJ) innovative, award winning Town Center Plan; counseling the planning board on matters related to site and building design. In addition to which he was responsible for preparing and writing zoning criteria for the township's large scale industrial development zone.

An invited architectural design juror at the New Jersey Institute of Technology, Rutgers University Department of Landscape Architecture, and urban planning workshop juror at the Woodrow Wilson School at Princeton University, he has also lectured, and written and published work on architecture and health care design.
